PROFESSIONAL SUMMARY

Hands-on Full-Stack Developer with a strong practical background in software development, Linux systems, computer technology and IT education. My primary focus is PHP/Laravel and Vue.js, with experience building complete web applications and SaaS platforms covering backend architecture, databases, authentication, authorization, role-based access control, responsive user interfaces, payments, subscriptions, real-time functionality and automated testing.

I enjoy solving complex technical problems independently and turning ideas into functional, maintainable software. My broader technical experience includes Linux server administration and native Windows/C++ development, providing a practical understanding across software, systems and infrastructure.

TECHNICAL SKILLS

Backend	PHP 8.x · Laravel 11/13 · Eloquent ORM · Jetstream · Sanctum · Cashier · REST APIs · Authentication · Authorization · Roles & Permissions · MySQL
Frontend	JavaScript · Vue 3 · Inertia.js · Tailwind CSS · Vite · Pinia · Component-based architecture · Responsive / Mobile-first UI
SaaS & Business	Multi-role applications · Teams/workspaces · Projects & tasks · Subscriptions · Wallets & transactions · Payments · Notifications · Activity/audit tracking · CMS/business modules · Real-time applications
Testing & Tools	PHPUnit · Unit/Feature/Integration testing · Git · GitHub · Composer · npm · CI workflows · VS Code
Linux & Infrastructure	Ubuntu Server · Nginx · MySQL · UFW · Fail2Ban · DNS/network services · Deployment · Server maintenance
Additional Development	C++ · Win32 · DirectX 11 · Dear ImGui · KissFFT · Real-time audio processing

SELECTED PROJECTS

SuiteForge — Laravel SaaS Platform

Laravel 13 · PHP · Vue 3 · Inertia.js · Tailwind CSS · MySQL · Laravel Reverb

Comprehensive SaaS foundation for production-oriented business applications, designed and developed with a multi-role architecture supporting Admin, Manager, Client and Guest experiences.

- User, team, role and permission management
- Project and task management with modern Laravel architecture
- Subscription management and wallet/transaction functionality
- Payment-ready architecture, including fiat and cryptocurrency gateway integration paths
- Real-time notifications and application updates using Laravel Reverb
- Activity tracking and audit-oriented functionality
- Responsive, mobile-first Vue/Tailwind interface
- Automated testing and CI validation across core functionality

GitHub: github.com/matejarh/suite-forge-app

EQ Switch — Native Windows Audio Application

C++ · Win32 · DirectX 11 · Dear ImGui · KissFFT

Native Windows desktop application for managing Equalizer APO profiles with real-time audio visualization.

- Win32 / DirectX 11 application with Dear ImGui interface
- Real-time stereo VU meters and 15-band frequency visualization
- FFT-based spectrum analysis using KissFFT
- DPI-aware user interface and configurable profile management

• Modular C++ architecture for audio capture, visualization and configuration

PROFESSIONAL EXPERIENCE

Computer Technology Instructor — Src.si

Ljubljana, Slovenia | 1998 – 2003

Provided computer technology education and practical IT instruction, worked with computer hardware and software, diagnosed technical problems and explained technical concepts to users with different levels of experience.

Computer Technology Instructor — Altira d.o.o.

Radovljica, Slovenia | 1994 – 1997

Delivered computer technology instruction and practical user support, including technical troubleshooting and assistance with computer systems and software.

LANGUAGES

Slovenian: Native · **English:** Professional Working Proficiency · **French:** Elementary

ADDITIONAL INFORMATION

Open-source enthusiast · Strong interest in software architecture and modern web technologies · Practical systems and infrastructure background · Comfortable working independently · Interested in remote development and long-term collaboration
